SUMMARY

DevSecOps Engineer with 1 year of hands-on experience in Linux, Docker, Kubernetes, Proxmox VE, infrastructure automation, networking, storage, and monitoring. Built and maintained development and demonstration environments, integrated applications, databases, and containerized services, and owned infrastructure reliability within team projects. Maintained 95% environment readiness and reduced environment provisioning time from 60–90 minutes to 3–6 minutes through automation.

PROFESSIONAL EXPERIENCE

INDEPENDENT DEVSECOPS & INFRA PROJECTS
DEVSECOPS ENGINEER

August 2025 - September 2026

- Built and maintained Kubernetes environments with ~98% readiness. Managed workloads, storage, networking, secrets, resource limits, health checks, and day-to-day troubleshooting.
- Automated Proxmox VE provisioning and cut environment setup time by ~90%. Replaced roughly 40 manual steps with Ansible and OpenTofu workflows covering host setup, networking, storage, VM/LXC provisioning, access control, firewalling, SSH, and TLS.
- Migrated 7 services from manual deployments to containers. Standardized deployment and recovery make environments easier to rebuild, maintain, and troubleshoot.
- Managed infrastructure across local, virtualized, remote, and NAT environments. Maintained around 20 VPN and tunnel connections using WireGuard, IPsec, reverse SSH, Cloudflare, VPS infra, and proxy services.
- Set up centralized monitoring and handled infrastructure troubleshooting. Used Zabbix and Linux networking tools to identify availability issues and resolve routing, NAT, DNS, VPN, proxy, and service failures.
- Improved security across Linux and virtualized infrastructure. Applied least-privilege access, RBAC, network segmentation, secrets management, firewalling, PKI, X.509, OAuth 2.0, and OpenID Connect.

Selected Projects: Proxmox Infrastructure Automation, Kubernetes Platform, Secure Remote Infrastructure, Zabbix Mobile monitoring, Local AI Infrastructure

SKILLS

OS: Linux (Debian, Arch, Ubuntu, RHEL-based), Cisco IOS, MikroTik RouterOS

Network & VPN: TCP/IP, DNS, DHCP, NAT, VLANs, firewalling (firewalld, iptables, tcpdump, ss), WireGuard, Xray, proxies, IPsec, nmap, BGP, QoS

Virtualization & Containers: Proxmox VE, Docker, Kubernetes, Helm, LXC

Security: TLS, PKI, X.509, GPG/OpenPGP, SSH, OWASP Top 10, OWASP Top 10 for Agentic Applications

Automation & AI: n8n, OpenCode, Codex, Claude Code, RAG, MCP, GitLab Runner, GitHub Actions, Argo CD

IaC & Scripts: Ansible, OpenTofu, Python, Bash

Other: Zabbix, Cloudflare, ClickHouse, PostgreSQL, Redis

EDUCATION

Kuban State Agrarian University

COURSES

ITMO University - Software and Data Analysis

LANGUAGES

English - Upper-Intermediate
